Dear Mr. Bagnall,

Re: Resistant Baseboard 10

Further to recent correspondence we write to confirm that we have been working in conjunction with Resistant Building Products Ltd for several years. During this time our renders have been approved for application onto the Resistant Baseboard 10 product through internal testing by Kilwaughter Minerals Ltd.

We confirm that, provided that the board has been stored, used and fitted in accordance with the supplier's instructions, we are satisfied that it can be used as a render carrier board for the K Rend render system, provided the maximum thickness of any render system does not exceed 10mm.

The client should also satisfy themselves that the properties of this MgO-based board align with the requirements of the project warranty provider for the specific project.

Yours sincerely,

A handwritten signature in black ink, appearing to read "A. McIntosh".

Dr Andrew McIntosh
Head of R&D
